Description du produit More sophistication, more efficiency, more style, more street – the Reason impresses on every inch of concrete, and embodies the pro bike concept unlike any other BMX in the collection. The Reason features full crmo main tubes (top tube, down tube and chain stays) on the frame (that is designed with extraordinary expertise by wethepeople), full crmo bars and forks, 170mm crank arm length and of course a great selection of pro parts including the éclat "Surge" nylon/fiberglass pedals, éclat "Unify" fat padded seat, fully sealed bearing on the front and a rear cassette hub, throw in a nice double wall rim on the rear to and your rolling straight. The Reason is also the first model to feature the new and slick 2.3" salt mid flow tire on the front. The result: an impressive and affordable BMX with a short backend, a low stand over height and a look that simply oozes style.
